

About us

Owner Travis Koski started Seaside Diesel Repair in 2007 in a small rented shop. He quickly became known for his quality of work and innovative problem-solving skills.

In 2013 he purchased his own shop located in Lemon Creek and became a Cummins dealer for Northern SE Alaska.

At Seaside Diesel Repair we work on large diesel and gas engine vehicles and equipment. We have trained and certified technicians using up-to-date diagnostic tools to meet your repair and maintenance needs.

This pamphlet describes our Preventative Maintenance Plan

- Benefits to joining
- PMP Program
- Service Types and Cost

Seaside Diesel Repair

5741 Concrete Way
Juneau, AK 99801

Seaside Diesel Repair, LLC

Benefits to joining our PMP Program

1. Lower your yearly maintenance costs
 - a) Catch catastrophic failure at starting point
 - b) Regular PM service extends the life of unit
2. Less down time
 - a) Advance scheduling allows us to adapt to your schedule
 - b) Parts are in stock and ready to use when unit arrives
3. Preferential scheduling to our PMP clients
4. Less stress
 - a) We track your fleets needs and contact you when services and DOT inspections are needed
5. We have certified, trained and experienced technicians

PMP Program

1. Take inventory and inspection of all enrolled units
 - a) One-time inspection
 - b) Complete all factory required maintenance/ repairs per miles and hours
2. Work with client to develop service interval plan that meets their specific needs
 - a) Oil changes
 - b) Tire rotations
 - c) Fluid flushes
 - d) Air filter replacement
3. We will input service interval information into our database that will allow us to track your units for upcoming services.
